Our editorial board is proud to present Visions of Research in Music Education (VRME) - Volume 4. Authors Walker, Wolf, Guerrini, Bower and Abrahams would like to share their research with the greater music education community, each offering their suggestions on how to improve music education.

The various authors have looked closely at middle school students, kindergarten children, elementary pupils, and choral curriculum as they hope to make a difference in what happens in the educational setting. Their efforts are but another step toward helping each of us improve music instruction regardless of the age of the learner. It is our hope that as you reflect on your own teaching and the research presented in VRME that you find something of interest to you. It is only through our collective efforts that learners in our classrooms are provided with the appropriate tools for their continued success in the music rooms of each of our schools.

If you are interested in submitting your recent research projects for possible publication in VRME - Volume 5, please feel free to forward your material to our editorial board for review. Additional information is located at <http://musicweb.rutgers.edu/vrme/>.
